

# RSV Prevention Program 2024

Thank you for choosing  
Humber River Health for  
your baby's birth!

We want to help keep newborns safe from  
a virus called Respiratory Syncytial Virus (RSV).

Beginning this year, all babies born before or during the RSV season (late fall to early spring) can be immunized to protect them from RSV.

When you come to the hospital to have your baby, you can choose to give your baby this immunization. During your hospital stay, your healthcare team will talk to you about the RSV immunization and offer it for your baby.

If your baby was born in 2024, and you want to book an appointment in the RSV clinic to immunize your baby, please call (416) 242-1000 ext. 21400.
